Thank you for purchasing this resource!

Follow these steps to get started

1. **Open the .psd file with Photoshop**
   (minimum version required: CS4).

2. **Doubleclick on the smart layer thumbnail to open the smart object. This layer is marked in red and is named** [DOUBLE CLICK TO EDIT]**.**

3. **Inside the .psb file that popped up you'll see a placeholder design used for demonstration. Hide or delete the placeholder, then drag & drop your own design in place.**

4. **Hit Save (Cmd/Ctrl+S) and close the window, The changes will apply in the main PSD file.**
